

Introducing
Steel Craft
New Classics
Decorative
Fixtures

Eight All-New Contemporary Patterns for Vanities, Sconces and Ceiling Fixtures.

The Easiest Way to Add a Broad Selection of Decorative Fixtures to Your Product Line.

a high-potential selling opportunity, complete and ready to go! *New Classics* Decorative fixtures are right for major commercial installations and projects of all sizes — lobbies, hallways, conference rooms, auditoriums, baths and more. They are equally at home in residential construction and renovations.

Each pattern is available in three styles of vanities, two styles of sconces and two ceiling models. Now architects and designers can specify a pattern throughout the building or facility, beautifully unifying rooms and spaces and adding a sophisticated design element everywhere lighting is installed.

Sales literature ready for your imprint. We make it easy for you to go to market. Full-color individual sell sheets for each fixture are ready for your company name and logo. Each sheet shows a large view of the fixture, the eight available patterns inspired by classic architectural and design styles, and a selection of rich decorator finishes to coordinate with any decor.
